ABOUT ME

I am a web developer that specializes in the MERN (MongoDb, Express, React, Node) stack. Fluent in HTML, CSS, and Javascript. Goal-oriented, driven leader who effectively collaborates and communicates cross functionality to produce successful outcomes.

PROJECTS

The Registry

React, Express, MongoDB, Node. GraphQL, JWT

The Registry is a full stack application that allows friends and family members access to a gift registry for new parents, a recent graduate, or newlyweds. As the team leader on this project, I contributed to both front and backend extensively.

Middlewhere

Express, Node, MySQL, Bootstrap, Handlebars

A social app utilizing Google API to help groups find their centralized geolocation to meet up with friends or colleagues. I was responsible for backend development for this application.

Social Space Invaders

HTML, CSS, Javascript, API

A calendar-based frontend app to share fun events in your area, including sporting events, concerts and breweries. This project was exclusively a frontend project.
