ABOUT ME

I am a web developer that specializes in the MERN (MongoDb, Express, React, Node) stack. Fluent in HTML, CSS, and Javascript. Goal-oriented, driven leader who effectively collaborates and communicates cross functionality to produce successful outcomes.

PROJECTS

The Registry

React, Express, MongoDB, Node. GraphQL, JWT

The Registry is a full stack application that allows friends and family members access to a gift registry for new parents, a recent graduate, or newlyweds. As the team leader on this project, I contributed to both front and backend extensively. Gift items were pulled from 5-10 major retailers and dynamically added to their respective registries.

Middlewhere

Express, Node, MySQL, Bootstrap, Handlebars

A social app utilizing Google API to help groups find their geolocation to meet up with friends or colleagues. Users can login using stored cookies, and find a centralized meeting spot based on pinpoint group location data. I was responsible for backend development for this application.

Social Space Invaders

HTML, CSS, Javascript, API

A calendar-based frontend app to share fun events in your area, including sporting events, concerts and breweries. Server-side API data used to locate events based on zip code provided. This project was exclusively a frontend project.

EDUCATION

University of Denver

October 2022
Denver, CO

Flex Full Stack Web Development Bootcamp

Carroll University

May 2019
Waukesha, WI

Master of Occupational Therapy

University of Iowa

December 2016
Iowa City, IA

Bootstrap

EXPERIENCE

Full Stack Web Developer

University of Denver

2022

Full-time, 12-week bootcamp to showcase my coding and collaboration skills, creating full-stack web applications that leverage modern programming languages, frameworks, and tools.
Dedicated 1000+ hours to master coding principles and real-world applications.

Occupational Therapist

Legacy Healthcare Services, Inc.

2019-2022

Planned, organized and implemented specific treatment programs or individual patients according to the principles and practices of occupational therapy.

Developed, improved, or restored skills in activities of daily living, work, or functional activities for caseload of over 90 residents in Assisted Living Facility and dementia-care unit.
